

Mykonos Bliss welcomes you to its PURESAPCE rooms, treated with the utmost care by the latest purification technologies, for a relaxing and safe stay.

PURESAPCE technology transforms interior spaces into environments that protect your well-being.

Be like the first guest in your room!

- 🔑 Your room is disinfected with one of the most efficient technologies on the market
- 🔑 Viruses, bacteria, mold, unpleasant odors, chemical residue disappear from your stay
- 🔑 Enjoy a stay now healthy, anti allergic and without unwanted guests, as if you were in a completely new room
- 🔑 Your room is systematically treated before your arrival

Advanced disinfection down to the last corner

- A unique combination of patented technologies with proven results even in the hospital sphere, which combine simplicity, speed and efficiency avoiding any resistance of germs, for a guaranteed result in the long term
- Natural disinfection and sterilization of all interior objects and spaces
- The germs are self destroyed
- No chemical residue remains in the room, the risk of allergies is nonexistent
- Responds to your request to provide you with security, a fresh, hygienic and clean atmosphere without chemical overload
- Help fight an invisible but real threat
- Prevents classic allergies during your stays
- Prefer a 'purespace' room rather than one that is not purified or chemically disinfected

Purespace®

Advanced and innovative technology for real progress in the quality of your stay

- Full spectrum of bactericidal, virucidal, fungicidal and sporicidal activity
- Same disinfection of air and surfaces: 100% of the environment is disinfected
- The natural properties of the product based on oxygen disinfect the whole area including the electronic parts
- The germs are self-destructed

Purespace® is a technology which disinfects and sterilizes the environment

Does not cause any danger to humans and the environment

The solution used breaks down into oxygen before your arrival

Innovation

Our concept is based on the distribution of a dry disinfectant mist, thanks to its 5µ nanoparticles, the solution reaches all surfaces uniformly.

Efficiency

Ensures complete disinfection by reducing the pathogenic load by 99.9% on all surfaces. Effective with each treatment.

Constant results

Constant efficiency for each application, independent of the applicator. You are guaranteed of the result.

Purity

No chemical residue on the surfaces. Viruses, bacteria and odors are absent. The room is like new.
